

INTRODUCTION

Welcome to my portfolio!

I'm Mecca Muhammad!, a skilled Data/Systems Analyst with a growing focus on Linux system administration and a solid background in data management, security operations, and compliance.

I hold certifications in CompTIA Security+, CompTIA A+, ITIL V4 and I will be earning my Network + certification soon.

I have hands-on experience with installing, configuring, monitoring and troubleshooting Linux and other operating systems, including Windows 10,11 and Mac OS.

My technical expertise includes working with Active Directory, PowerShell, Terminal, SAP S/4 HANA and more.

I've supported data migration projects, managed customer and manufacturing data, and ensured regulatory compliance with standards like HIPAA, GDPR, and ISO 27001.

Through my experience in incident response and security monitoring, I've developed strong troubleshooting skills and the ability to quickly diagnose and resolve system issues.

This portfolio and my GitHub profile highlights my experience with Linux-based systems, system automation, and process improvement. I'm eager to apply my technical knowledge and problem-solving abilities to ensure secure, reliable, and optimized Linux environments.

Explore my work to see how I can contribute to your team as a Linux System Administrator!
